Project Overview

AURA-BEAUTY is a web-based e-commerce platform designed for Ethiopian customers to browse and purchase popular international cosmetic products. The platform provides a user-friendly interface for customers to explore a wide range of beauty products categorized by type, while also giving administrators the tools to manage the product inventory and access customer orders efficiently. The platform also supports guest checkout for improved convenience.

Technology Stack

Purpose	Technology Used
Front-End UI	HTML, CSS, JavaScript
Back-End Development	PHP, Laravel (MVC Framework)
Database	MySQL
Development Tool	Visual Studio Code

Project Workflow

- **Requirement Gathering** – Defined functionalities for customer and admin users
- **UI Design** – Built responsive front-end using HTML, CSS, and basic JavaScript
- **Backend Integration** – Developed with Laravel using routes, controllers, and views
- **Database Setup** – Designed MySQL tables for products, users, and orders
- **Testing & Validation** – Module-based testing for cart, checkout, and admin panel
- **Final Testing** – Project tested locally on a development machine

Getting Started

To set up and run the AURA-BEAUTY platform locally, follow these steps once the project files are received:

System Requirements

- PHP 7.4 or higher
- Composer
- MySQL
- Visual Studio Code (or equivalent code editor)

Setup Instructions (after receiving project files)

1. Unzip the project folder
2. Run `composer install` to install PHP dependencies

3. Copy `.env.example` to `.env` and configure your database settings
4. Run `php artisan migrate` to create database tables
5. Start the development server using `php artisan serve`
6. Open `http://localhost:8000` in your browser to view the application

Note: Project source files will be provided separately.

User Functionalities (Customer Side)

- **Navigation Bar** – Browse products by category:
  - Eye (e.g., mascara, eyeliner)
  - Lip (e.g., lipstick, gloss)
  - Face (e.g., foundation, concealer)
  - Skincare & more
- **Special Sections**
  - Best-Seller Products
  - Products on Sale
  - View All Products
- **Shopping Cart**
  - Add items to cart
  - View subtotal and estimated shipping
- **Checkout**
  - Place orders with or without logging in (guest checkout supported)

Admin Functionalities (Admin Panel)

- Secure Admin Login
- Add New Products (name, price, category, image, description)
- Edit Product Details
- Delete Products
- View Product Listings
- View Customer Orders

Database and Backup

- All data (products, orders, admin accounts) is securely stored in a centralized MySQL database
- Regular backups are maintained to protect against data loss
- Backup procedures ensure system recovery and continuity of service

Summary

AURA-BEAUTY offers a sleek, intuitive online cosmetics shopping experience tailored for Ethiopian customers. Built using Laravel and modern web technologies, it balances front-end simplicity with robust back-end features for administration and data management.
